APPLICATION:
Modulating Gas fired water boiler for indoor installation. Approved for closet or alcove installations. For use with natural or liquefied petroleum (LP/Propane) fuel gases. Wall mounted – optional floor stand available. All boilers are factory assembled with controls and wiring and test fired to ensure dependable performance. Boiler shall be certified for Direct Vent applications only.

CERTIFICATION AND APPROVALS:
Stainless Steel heat exchanger is manufactured and tested in accordance with American Society of Mechanical Engineers (ASME) and certified by Canadian Standards Association (CSA), AHRI, NRCAN. Registered with National Board BPVI, and Massachusetts Board. Stainless steel heat exchanger is tested for maximum allowable working pressure of 43.5 psig in accordance with ASME boiler and pressure vessel code, section IV, rules for construction of heating boilers. A 30 psig safety relief valve is shipped standard.

BOILERS INCLUDE:
- Wall mount bracket, mounting hardware and actual size Wall Mount Template
- Boiler is equipped with dedicated connection to an optional Indirect hot water tank and an internal automatic 3 way diverting valve to allow Domestic Hot Water Priority operation.
- Boiler includes factory installed and wired 2 speed circulator pump.
- Digital Boiler Control:
  - Control is Self Commissioning, auto adjusts to fuel type and self-calibrates at start-up for correct fuel/air mixture. Control continuously monitors flame signal and adjusts the gas valve during normal operation for maximum efficiency.
  - Control system is PCB integral controller with LCD digital/graphical display.
  - Control can sense and display water temperature and indicate when boiler is in central heating or domestic water mode.
  - Control can accept an optional Outdoor Air sensor and has field adjustable reset curves.
  - Control displays Error Codes and Diagnostic information.
• Boiler Combustion System:
  ▶ The Gas valve is a modulating valve capable of firing from 125,000 BTU input down to 22,000 BTU input in Heat mode (5.7:1 turn down).
  ▶ Induced draft blower is variable speed controlled by the PCB.
  ▶ Burner is constructed of 316L stainless steel.
  ▶ Ignition system shall incorporate a Direct Spark Igniter and a separate Flame Sensing rod.

• Heat Exchanger:
  ▶ Boiler’s primary heat exchanger is constructed of 316L stainless steel.

• Electrical
  ▶ 120 volts AC, 60 Hertz, 1-phase; less than 15 amps.
  ▶ Factory wired 3-foot appliance cord with male plug end.
  ▶ Low voltage terminal strip for Thermostat, Outdoor Air Sensor, Indirect Tank sensor.

• Warranty
  ▶ Factory Standard Warranty is 10 years on heat exchanger, one year on parts.
  ▶ Warranty is extended to 10 years on heat exchanger, two years parts plus two years labor upon online warranty registration and completion of contractor registration.

• Optional Equipment
  ▶ Outdoor Air Sensor Kit
  ▶ Indirect Tank Sensor Kit
  ▶ Coaxial and Two-pipe venting components
  ▶ Floor Stand Kit
