WARNING: If the information in this manual is not followed exactly, a fire or explosion may result causing property damage, personal injury or loss of life.

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

WHAT TO DO IF YOU SMELL GAS

• Do not try to light any appliance.
• Do not touch any electrical switch; do not use any phone in your building.
• Immediately call your gas supplier from a neighbor's phone. Follow the gas supplier's instructions.
• If you cannot reach your gas supplier, call the fire department.

Installation and service must be performed by a qualified installer, service agency or the gas supplier.
1.1 General
This boiler has few user serviceable parts. Maintenance and Service must be completed by qualified agency.

WARNING
Fire, explosion, asphyxiation and electrical shock hazard. Improper maintenance and service could result in death or serious injury. Read this manual and understand all requirements, including use of qualified agency where directed.

1.2 Become familiar with symbols identifying potential hazards.

This is the safety alert symbol. Symbol alerts you to potential personal injury hazards. Obey all safety messages following this symbol to avoid possible injury or death.

DANGER
Indicates a hazardous situation which, if not avoided, WILL result in death or serious injury

WARNING
Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION
Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE
Used to address practices not related to personal injury.

1.3 What To Do Should Overheating Occur
Do not turn off or disconnect electrical supply to boiler and pumps. Shut off gas supply at location external to appliance.

1.4 What To Do If Boiler Or Any Part Has Been Under Water
Do not use boiler if any part has been under water. Immediately call a qualified service technician to inspect boiler and to replace any part of control system and any gas control which has been under water.
If you do not follow these instructions exactly, a fire or explosion may result causing property damage, personal injury or loss of life.

- This appliance is equipped with an ignition device which automatically lights burner. **Do NOT try to light this burner by hand.**
- Before operating smell all around appliance area for gas. Be sure to smell next to floor because some gas is heavier than air and will settle to the floor.

**Use only your hand to turn the gas shutoff valve.** Never use tools. If valve will not turn by hand, do not try to repair it, call a qualified service technician. Force or attempted repair may result in fire or explosion.

**Do not use this appliance if any part has been under water.** Immediately call a qualified service technician to inspect appliance and to replace any part of control system and any gas control which has been under water.

---

### 2.1 Operating Instructions

**Stop! Read Safety information above.**

- Set thermostat to lowest setting.
- Turn "OFF" all electrical power to appliance.
- This appliance is equipped with an ignition device which automatically lights the burner. **Do not try to light burner by hand!**
- Remove front jacket panel.
- Turn gas shutoff valve to closed position. Handle should be perpendicular to gas pipe. See Figures 2-1 and 2-2.
- Wait 5 minutes for any gas to clear. Smell for gas, including near floor. If you smell gas, **STOP!** Follow instructions on this page: "**What To Do If You Smell Gas.**" If you do not smell gas, go to next step.
- Turn gas shutoff valve to the open position. Handle should be parallel to gas pipe.
- Replace front jacket panel.
- Turn "ON" electrical power to appliance.
- Set thermostat to desired setting.
- If the appliance will not operate, follow instructions TO TURN OFF GAS TO APPLIANCE and call your service technician or gas supplier.

---

### 2.2 To Turn Off Gas To Appliance

- Set thermostat to lowest setting.
- Turn "OFF" all electric power to appliance if service is to be performed.
- Remove front jacket panel.
- Turn gas shutoff valve handle to closed position. Handle should be perpendicular to gas pipe. See Figures 2-1 and 2-2.
- Replace front jacket panel.

---

**WHAT TO DO IF YOU SMELL GAS**

- Do not try to light any appliance.
- Do not touch any electrical switch; do not use any phone in your building.
- Immediately call your gas supplier from a neighbor’s phone. Follow the gas supplier’s instructions.
- If you cannot reach your gas supplier, call the fire department.

---

**CAUTION**

**2-1 Gas Shutoff Valve Outside Boiler Jacket (view from top rear of boiler)***

*Supplied Manual Main Gas Shutoff Valve (shown in open position)*
4 - CONTROL MODULE

4.1 Introduction
Boiler is equipped with programmable electronic control and user interface module.

4.2 Operation

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reset</td>
<td>- Manual Lockout Reset</td>
</tr>
<tr>
<td>Menu</td>
<td>- Enter/Exit user menu</td>
</tr>
<tr>
<td></td>
<td>- Go to previous screen</td>
</tr>
<tr>
<td>Enter</td>
<td>- Select a menu item</td>
</tr>
<tr>
<td></td>
<td>- Confirm new parameter value</td>
</tr>
<tr>
<td>+</td>
<td>- Scroll up to next menu item</td>
</tr>
<tr>
<td></td>
<td>- Increase value</td>
</tr>
<tr>
<td>-</td>
<td>- Scroll down to next menu item</td>
</tr>
<tr>
<td></td>
<td>- Decrease value</td>
</tr>
</tbody>
</table>

4.3 Status Indication
The following status screens can be displayed:

- **Boiler Status Indicator**
  - F = Flame Detected
  - P = Central Heating/System Pump On
  - B = Combustion Air Blower On
  - S = Safety Relay Check
  - G = Gas Valve Open
  - D = DHW Pump On

- **Combustion Air Blower Speed Indicator**

- **Service Reminder Indicator**
  - Service Reminder: No Demand
  - Standby: 75°F

- **Boiler in Standby Mode**

- **Boiler Supply Water Temperature Indicator**

- **Boiler Running in Central Heat mode**

- **Boiler Running in DHW mode**

- **Lockout Alarm Indicator**

- **Blocking Error**
  - Error code and short text description displayed. Boiler automatically returns to Standby Mode when condition eliminated.
## 4 - CONTROL MODULE

### 4.4 Sequence of Operation

<table>
<thead>
<tr>
<th>Operational State</th>

# 4 - CONTROL MODULE

## 4.5 Theory of Operation

### User Interface Display

| STANDBY | **SETTINGS**  
| Central Heating  
| Setpoint | Boiler operates in standby mode until Central Heat (CH) or Domestic Hot Water (DHW) demand detected.  
| Access User Menu by pressing ‘Menu’ key on user interface. |

### User Menu

| **User Menu** | User Menu structure. Use scroll keys to move to desired menu, and press Enter.  
| • ‘Boiler Status’ submenu  
| • ‘Settings’ submenu – View CH , DHW supply water set point.  
| • ‘Cascade Status’ submenu – Boiler set to function as part of multiple boiler installation; submenu used to view runtime parameters. See Multiple Boiler Manual. |

### Boiler Status

| **Boiler Status** | Supply Temperature set point displayed.  
| CH set point displayed if boiler running in CH mode.  
| Note: Value may change in proportion to outdoor temperature when running in Outdoor Reset mode.  
| DHW supply set point displayed if boiler is running in DHW mode. |

| **Boiler Status** | Water Temperature leaving boiler heat exchanger.  
| Water Temperature entering boiler heat exchanger.  
| DHW Thermostat (open or closed)  
| System Water Temperature (if used)  
| Vent System Temperature  
| Outdoor Temperature (if used)  
| Heat Exchanger Pump status (On or Off)  
| CH/System Pump status (if used, On or Off)  
<p>| DHW Pump status (if used, On or Off) |</p>
<table>
<thead>
<tr>
<th>Settings</th>
<th>User Interface Display</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Central Heating Setpoint</strong></td>
<td><img src="image" alt="Central Heating Setpoint" /></td>
<td>Adjust CH set point to hydronic system design while in Operating in CH Mode = 0 (CH with Thermostat) or 3 (Permanent Demand). In CH Mode = 1 (CH with Thermostat and Outdoor Reset) or 2 (CH with Full Outdoor Reset). Display will change to 'OD Reset Setpoint’ and cannot be changed. Control Module calculates set point based on outdoor temperature.</td>
</tr>
<tr>
<td><strong>DHW Setpoint</strong></td>
<td><img src="image" alt="DHW Setpoint" /></td>
<td>DHW set point determines supply water temperature set point when operating in DHW mode. Contact qualified agency to make changes.</td>
</tr>
<tr>
<td><strong>Change Temperature Units</strong></td>
<td><img src="image" alt="Change Temperature Units" /></td>
<td>Select temperature unit of measure. Fahrenheit °F or Celsius °C.</td>

</tbody>
</table>
5 - TROUBLE SHOOTING

- Is Power light ON?
  - YES
  - NO

- Is Power Switch ON?
  - YES
  - NO
  (Check all boiler power switches)

- Is Reset Light ON?
  - YES
  - NO

- Is main circuit breaker in ON position?
  - YES
  - NO
  Contact Qualified Agency to Service Boiler

- Is Power Switch ON?
  - YES
  - NO
  Place all boiler Power Switches in ON position

- Is Heat Light ON?
  - YES
  - NO
  Check Thermostat Setting

- Boiler is in Stand-by Mode

- Contact Qualified Agency to Service Boiler

- Is Reset Light ON?
  - YES
  - NO
Perform general housekeeping and maintenance as specified below.

### 6.1 Continuous
- Keep boiler area free from combustible materials, gasoline and other flammable vapors and liquids.
- Keep combustion air and vent terminations (outside building) free from trash, vegetation and other items capable of blocking flow.

### 6.2 Monthly
- Inspect combustion air, vent, and condensate drain piping for deterioration, leaks or sagging. Contact qualified agency, as necessary.
- Inspect condensate drain trap. See Figure 6-1.
  - Follow instructions TO TURN OFF GAS TO APPLIANCE. See section 2.
  - Inspect condensate drain trap for sediment or blockage. Contact qualified agency if cleaning required.
- Inspect system piping for leaks. Contact qualified agency, as necessary.
- Check air vent(s) for leakage.
- Follow OPERATING INSTRUCTIONS to return to normal operation.

### 6.3 Check According to Manufacturer's Instructions
- Safety Relief Valve - Refer to manufacturer's instructions. See Figure 6-2.

### WARNING
Asphyxiation hazard. Contact qualified agency if condensate trap is not filled with water.

### 6.4 Annually or Beginning Each Heating Season
- Contact qualified agency to perform maintenance and cleaning per Installation, Operation and Maintenance manual. Inspection will include examining all flue product carrying areas, vent system, burner and heat exchanger. Will also include filling boiler with water if drained as part of End of Heating Season procedure.
6 - MAINTENANCE

6.5 End Of Heating Season, If Boiler Not Used For Domestic Hot Water.

- Follow instructions to TURN OFF GAS TO APPLIANCE. See section 2.
- Contact qualified agency to drain heating system (if system does not use antifreeze) and condensate trap if heating system is exposed to freezing temperatures while out of service.
