

Innovative. Efficient. Dependable. Dunkirk.

Helix VLT

Up to 95% AFUE Residential Gas Modulating Condensing Boiler

INNOVATIVE—Because we wouldn't have it any other way...

The fact is Dunkirk has been designing, manufacturing, and marketing residential condensing boilers longer than any other North American company. We were the first to introduce 95% efficient condensing boilers. Unlike most North American boiler companies Dunkirk designed a heat exchanger for our demanding American condensing boiler customers. Our American craftsmen are certified to test and apply the crucial ASME mark for safe condensing boiler pressure vessels in our factory. Simply put - if you want the most advanced boiler available from an American manufacturer, you want Dunkirk.

Introducing the latest in condensing boiler technology.

Dunkirk's new Helix VLT "Vertical Laser Tube," condensing boiler features a revolutionary, vertically mounted, helical fin tube heat exchanger, made of 316L/444 stainless steel. This self cleaning design features wide, smooth waterways that help remove hard water deposits and prevent scaling.

Dunkirk understands that there are more important things in life to spend your money on than heating bills; that's why we're proud to bring you the most efficient, forward-thinking home heating solutions available today.

Home heating goes well beyond the initial cost of the system. Your boiler selection impacts your monthly bills. Efficiency, ease of maintenance, and longevity all add up. Spikes in utility rates or costly maintenance and repairs can easily derail the best financial plan.

EFFICIENT— Just look at what you could be saving annually...

The VLT features up to 95% AFUE. Just add up the savings:

- Up to 95% AFUE
- Sealed Combustion
- *Outdoor Temperature Reset

(*A factory standard Outdoor Temperature Reset adjusts water supply temperature for best possible fuel economy based on actual seasonal conditions.)

The increased efficiency of the VLT could save you up to 40% on your heating bill each year. If you pay \$1,800 annually to heat your home, you could save as much as \$720 per year.

That's \$3,600 over 5 years!

†(Individual savings may vary).

The Dunkirk VLT's original design incorporates easy maintenance, durability and safety to make the most of your home heating investment. The self cleaning heat exchanger features wide smooth waterways that help remove hard water deposits and prevent scaling. A corrosion resistant CPVC flue collector adds to the longevity of the boiler. The VLT's sealed housing reduces noise for quiet comfort in any living space. Since most municipal codes require heating systems to incorporate a Low Water Cut Off (LWCO) to guard against unsafe operation, the Dunkirk VLT features a built-in LWCO.

DEPENDABLE— Dunkirk holds our boilers to the highest quality standards and we stand behind our products...

Each VLT boiler produced is subjected to a rigorous set of quality control checks before it leaves our factory. Dunkirk checks all of the electrical, plumbing, pressure vessel and combustion set up parameters prior to approving a VLT for shipment. We even include the final computer generated results for your professional contractor to reference while completing your installation. Every Dunkirk VLT is backed by a 15 year limited manufacturer's heat exchanger warranty, and the availability of optional Comfort Plus Parts & Labor Extended Warranties ensure you peace of mind for years to come.

Factory wired and installed, probe-type low water cut off with test button.

Built in primary/secondary piping with pump.

Control features simple text display, outdoor reset, priority domestic hot water and integrated multiple boiler control for up to 16 modules.

Innovative 316L/444 stainless steel fin tube heat exchanger.

Simplified electrical connections with removable terminal block.

quick access.

Bottom Connections

Replacement ready with 1-1/4" piping connections and low pressure drop - no high head pump required.

Wall mount bracket included

Integral Condensate Trap.
