

Innovative. Efficient. Dependable. Dunkirk.

XEB

Up to 84.4% AFUE Gas Fired Hot Water Boiler

- Available in 6 sizes from 42 MBH to 225 MBH.
- Dependable Cast Iron Heat Exchanger with Cast Iron Push Nipples. The Sections and Push Nipples expand at the same rate when heated. By using similar materials instead of less expensive gaskets the boiler maintains a water tight seal over time.
- Honeywell High Limit/Electronic Ignition Control.
 - Recessed under the boiler's protective jacket
 - Digital temperature display and diagnostics
 - Plug in connection for the inducer fan
 - Plug in connection for the system pump

Control monitors the water temperature and delays the burner starting until residual heat has been transferred. This maximizes efficiency by turning on the burner only when needed.

- Induced Draft Fan allows flue gases to be pulled through the boiler and exhausted through a chimney or side-wall vent.
- Textured paint Jacket. Small compact design is ideal for low clearance installations.
- Cast to Last Warranty
 - 20 year non-prorated limited warranty

Dunkirk XEB Series II Gas Fired Hot Water Boiler

Dimensional Diagram	Model	Input Rate (MBH) ⁽¹⁾	Heating Capacity (MBH) ⁽¹⁾	Net AHRI	Vent Diameter			
				Rating, Water (MBH) ⁽²⁾		Horizontal Vent (Category III)	AFUE %	
Front A TEMPERATURE PRESSURE GAUGE JULIAN SUPPLY PRESSURE JULIAN S	XEB-2	42	36	31	4"	3"	84.4%	
	XEB-3	75	63	55	4"	3"	83.4%	
	XEB-4	112	94	82	4"	3"	83.0%	
	XEB-5	150	125	109	4"	3"	82.7%	
	XEB-6	187	155	135	4"	4"	82.3%	
	XEB-7	225	186	162	4"	4"	82.0%	
	(1) Input rating for sea level to 2,000 ft. (610m) above sea level. United States, over 2000 ft (610m) above sea level. Reduce input rate 4% for every 1000 ft (304m) above sea level.							
	(2) Net AHRI Water Ratings shown based on piping and pickup allowance of 1.15. Consult manufacturer before selecting boiler for installations having unusual piping and pickup requirements, such as intermittent system operation, extensive piping systems, etc. For forced hot water systems where boiler and all piping within area to be heated, boiler may be selected on basis of its heating capacity.							
VALVE	(3) Boiler is provided with a 3" x 4" increaser for chimney vent applications. This does not infer that the connection to the chimney will always be 4". Please refer to IOM, National Fuel Gas Code, ANSI Z223.1/NFPA54, or applicable provisions of the local building codes for details concerning proper chimney connections.
