

Dunkirk® | EW II Series II

Innovative. Efficient. Dependable. Dunkirk.

Empire Water II

Up to 86.5% AFUE High Efficiency Oil Fired Hot Water Boiler

- Available in 9 sizes from 91 to 280 Mbh.
- Dependable Cast Iron Heat Exchanger with Cast Iron Push Nipples. The Sections and Push Nipples expand at the same rate when heated. By using similar materials instead of less expensive gaskets the boiler maintains a water tight seal over time.
- Honeywell High Limit and Circulator Relay Control.
 - Digital Temperature Display and Diagnostics.
- Less Coil: Control monitors water temperature and delays the burner starting until any residual heat has been transferred. Thermal purge logic measures rate of temperature change inside the boiler and delays burner firing accordingly. This maximizes efficiency by turning on the burner only when needed.
- With Coil: Low Limit Control seeks maximum temperature to satisfy domestic hot water call bypassing thermal purge logic.
- Atmospheric Chimney Vent Boiler.
- Optional Tankless Heater Coil.
- Textured paint Jacket.
- 20 Year Non-Prorated Warranty (Residential Applications).
