PLYMOUTH STEAM II

NATURAL OR PROPANE GAS-FIRED BOILERS

Dunkirk®
America's Hottest Boiler Value!
An ISO 9001-2000 Certified Company
The Plymouth Steam II Boiler by Dunkirk offers the best combination of heating comfort, efficiency, reliability... and affordability, making it one of America’s Hottest Boiler Values.

**Heating Efficiency**
The high efficiency of the Plymouth steam boiler renders outstanding performance and low operating costs.

**Electronic Ignition**
(Option) Pilot is lit automatically and stays lit only when needed, eliminating fuel waste.

**Integral Draft Diverter**
Dunkirk utilizes built-in draft diverter technology that is factory designed to protect against harmful carbon monoxide back drafts. Unlike competitor diverters erected in-field, Dunkirk eliminates any installation guesswork to ensure your family’s safety.

**Effikal Vent Damper**
Automatically closes when the unit turns off, preventing heated air from escaping up the chimney. Effikal provides the strongest vent damper warranty in the industry.

**Titanium Burners**
Dunkirk’s exclusive high-tech titanium composite burners resist corrosion and oxidation while withstanding more heat than conventional stainless steel or aluminized burners. They provide superior strength and longevity and are backed by a full 3-year warranty, triple the industry standard.

**Cast Iron Sections & Push Nipples**
Dunkirk utilizes cast iron to construct the boiler’s heat exchanger to provide heat transfer, reliability and strength. Since like materials expand and contract in the same proportion during heating and cooling, cast iron push nipples and sections produce stronger, more water-tight seals than steel push nipples or rubber gaskets.

**Easy Installation**
Surprisingly compact, the Plymouth Steam II Boiler fits in tight spaces and is supplied assembled, with controls that are accessible and completely wired. Piping is also at hand for easy connection to the system.

**Easy Maintenance**
Low water cutoff is electronic, therefore, results in minimal homeowner maintenance. Controls are easily accessible without having to remove the jacket, and our standard controls are readily available, making Dunkirk Boilers easy to service.

**Dunkirk Quality**
Since 1928, American-made Dunkirk Boilers have been leading the industry in value and reliability with innovative designs and premium quality components. Assured performance has placed Dunkirk quality at the top in trusted reliability (99.91%*). Every gas boiler we manufacture is test fired prior to shipment. This boiler is certified by C.S.A. in the United States; heat exchangers by ASME; and efficiency ratings by the Hydronics Institute.

---

* Data on file - Dunkirk Boilers

**Strongest Warranty in the Industry**
Dunkirk backs all of its residential cast iron steam boilers with a full twelve year warranty covering the entire heat exchanger. Most competitor’s warranties cover heat exchanger sections only and most last for 10 years.
PLYMOUTH STEAM STANDARD EQUIPMENT

P(V) SB SERIES
STANDARD EQUIPMENT

- Assembled boiler with insulated jacket
- Two 2-1/2" supply tappings and two 2-1/2" return tappings.
- Integral draft diverter – built into jacket
- 24 volt, 40VA transformer
- Pressure limit control
- Electronic probe type low water cut off
- Flame rollout safety shut-off fuse link and blocked vent safety shut-off switch with spare fuse link included
- Sight Glass Water Level Gauge
- Steam pressure gauge
- 3/4" boiler drain valve
- 15 lb. ASME pop safety valve
- Two 2-1/2 square head pipe plugs – to plug unused supply and return tappings
- Vent damper
- Complete installation instructions

- Completely installed and wired gas control systems with burners and manifold, consisting of:
  - Titanium composite burners
  - Automatic redundant combination gas valve, 24 volt

  ELECTRONIC IGNITION ONLY:
  - Intermittent Pilot Control, continuous re-try, 100% shut off
  - Combination pilot burner/electrode/flame sensor

  STANDING PILOT ONLY:
  - Pilot burner & thermocouple

OPTIONAL EQUIPMENT

- Combustible floor plate – 14614031 for 3-6 section; 14614032 for 7-9 section
- Electronic Water Feeder
- Natural to propane conversion kit (when ordering kit, please provide serial number of boiler to be converted)

† MBH = 1,000 Btuh

*Btuh = British Thermal Unit Per Hour

† For all altitudes above 2,000 feet, ratings should be reduced at the rate of 4% for each 1,000 feet above sea level.

NEW YORK CITY MEA NUMBER: 77-31-6

† Ratings in square feet are compared at 240 Btuh / square foot for steam boilers.

- The ratings marked Net I=B=R Ratings represent the heat available to the radiation or terminal units. The Net I=B=R Ratings shown are based on an allowance of 1.33 in accordance with the factors shown in the I=B=R Code as published by The Hydronics Institute.
- Selection of boiler size should be based upon Net I=B=R Rating being equal to or greater than the installed radiation in square feet EDR.
- Consult manufacturer before selecting a boiler for installations having unusual piping and pick-up requirements.

Dunkirk Quality Heating. America’s Hottest Boiler Value! Dunkirk hydronic boilers lead the industry in value, with premium quality design and componentry. In fact, some of the most respected “brand name” boilers are produced by Dunkirk. These major manufacturers selected Dunkirk hydronic boilers for the same basic reasons you should: superb quality and unmatched value. Just compare our quality to cost ratio, and your boiler choice will become perfectly clear.

Specifications and dimensions are subject to change without notice. Made in America by American Craftsmen.
